

**If you have an injury to your head** and are unsure if you have a concussion, here are some signs to watch for:

- Headache
- Dizziness or balance problems
- Feeling dazed, foggy or stunned
- Fatigue
- Memory problems
- Slurred speech
- Trouble concentrating
- Irritability or emotional changes
- Nausea
- Vision problems

If you are experiencing these signs or symptoms, contact the OSU Sports Medicine Center Sports Concussion Program at (614) 293-3600 or your primary care physician.

## **OSU Sports Medicine Center offers a comprehensive Sports Concussion Program. We offer:**

**Access:** We can see an athlete within 24-48 hours, Monday through Friday.

**Communication:** We offer consultation as well as evaluation and management of the injury and the return-to-play process.

**Expertise:** Our multidisciplinary team of physicians, neuropsychologists and certified athletic trainers has experience with pediatric, high school, college and professional athletes.

**Neurocognitive testing:** We are certified ImPACT Concussion Management Consultants and offer baseline as well as post-injury testing.

**Convenience:** All evaluation, testing and imaging are offered in one convenient location.

**Rehabilitation:** Treatment includes individualized rehabilitation for safe return to sport and academics.
